

🔗 Proprietary M&A / PE Deal Origination

Sourcing European Distressed Assets **at Scale**

Platform Evaluation & Intelligence Infrastructure for Private Equity & Special Situations Funds

PREPARED FOR

[Insert Client Company Name] Investment Committee

PRESENTER

George Woodworth, AcquireEU

DATA STATUS

Real-Time • 16 Pan-European Registries

The Fragmented European Market

 32 Buried Regional Registries

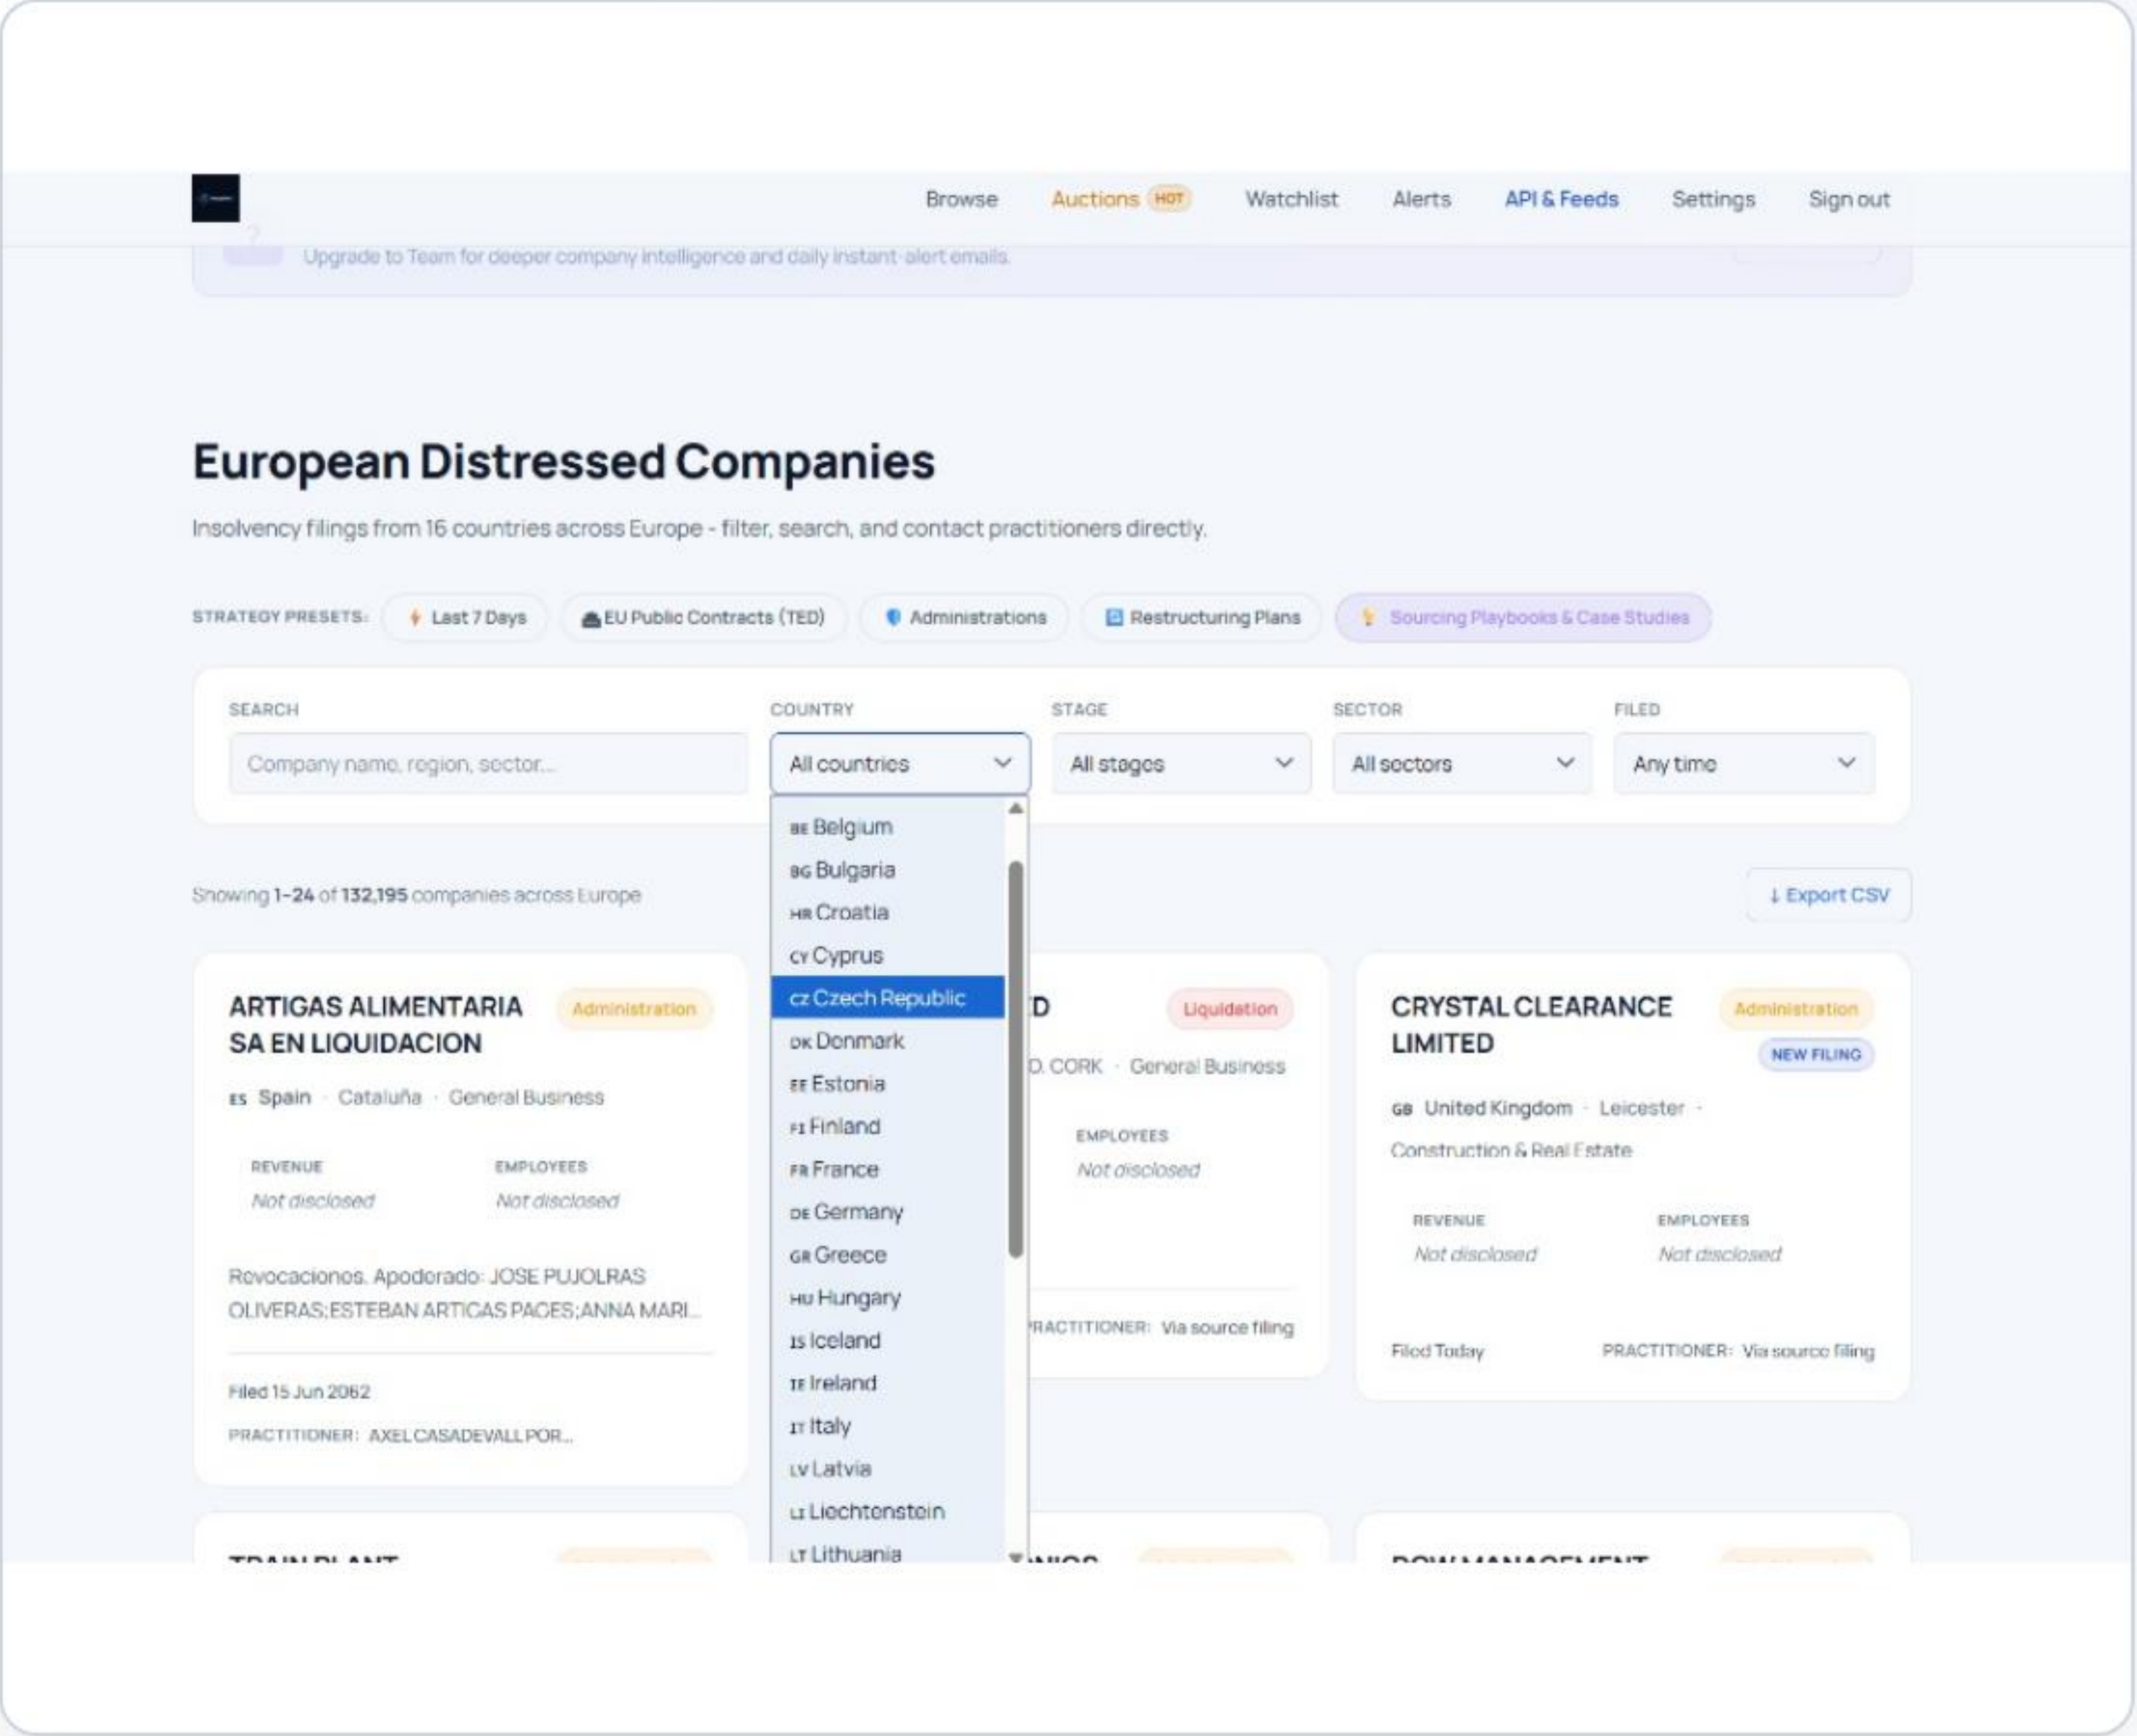

Insolvency and restructuring data is buried across 32 different regional registries in multiple languages and unstructured court filings.

 The "Broker Delay" Trap

By the time an opportunity reaches a broker's desk, exclusivity is gone and it is already an intensely contested, highly competitive auction.

 Technical Scalability Deficit

Firms lack the technical capability and continuous infrastructure required to monitor 100,000+ live court filings across Europe in real-time.

Real-Time Primary Source Intelligence

⚡ 16 Official Government Registries

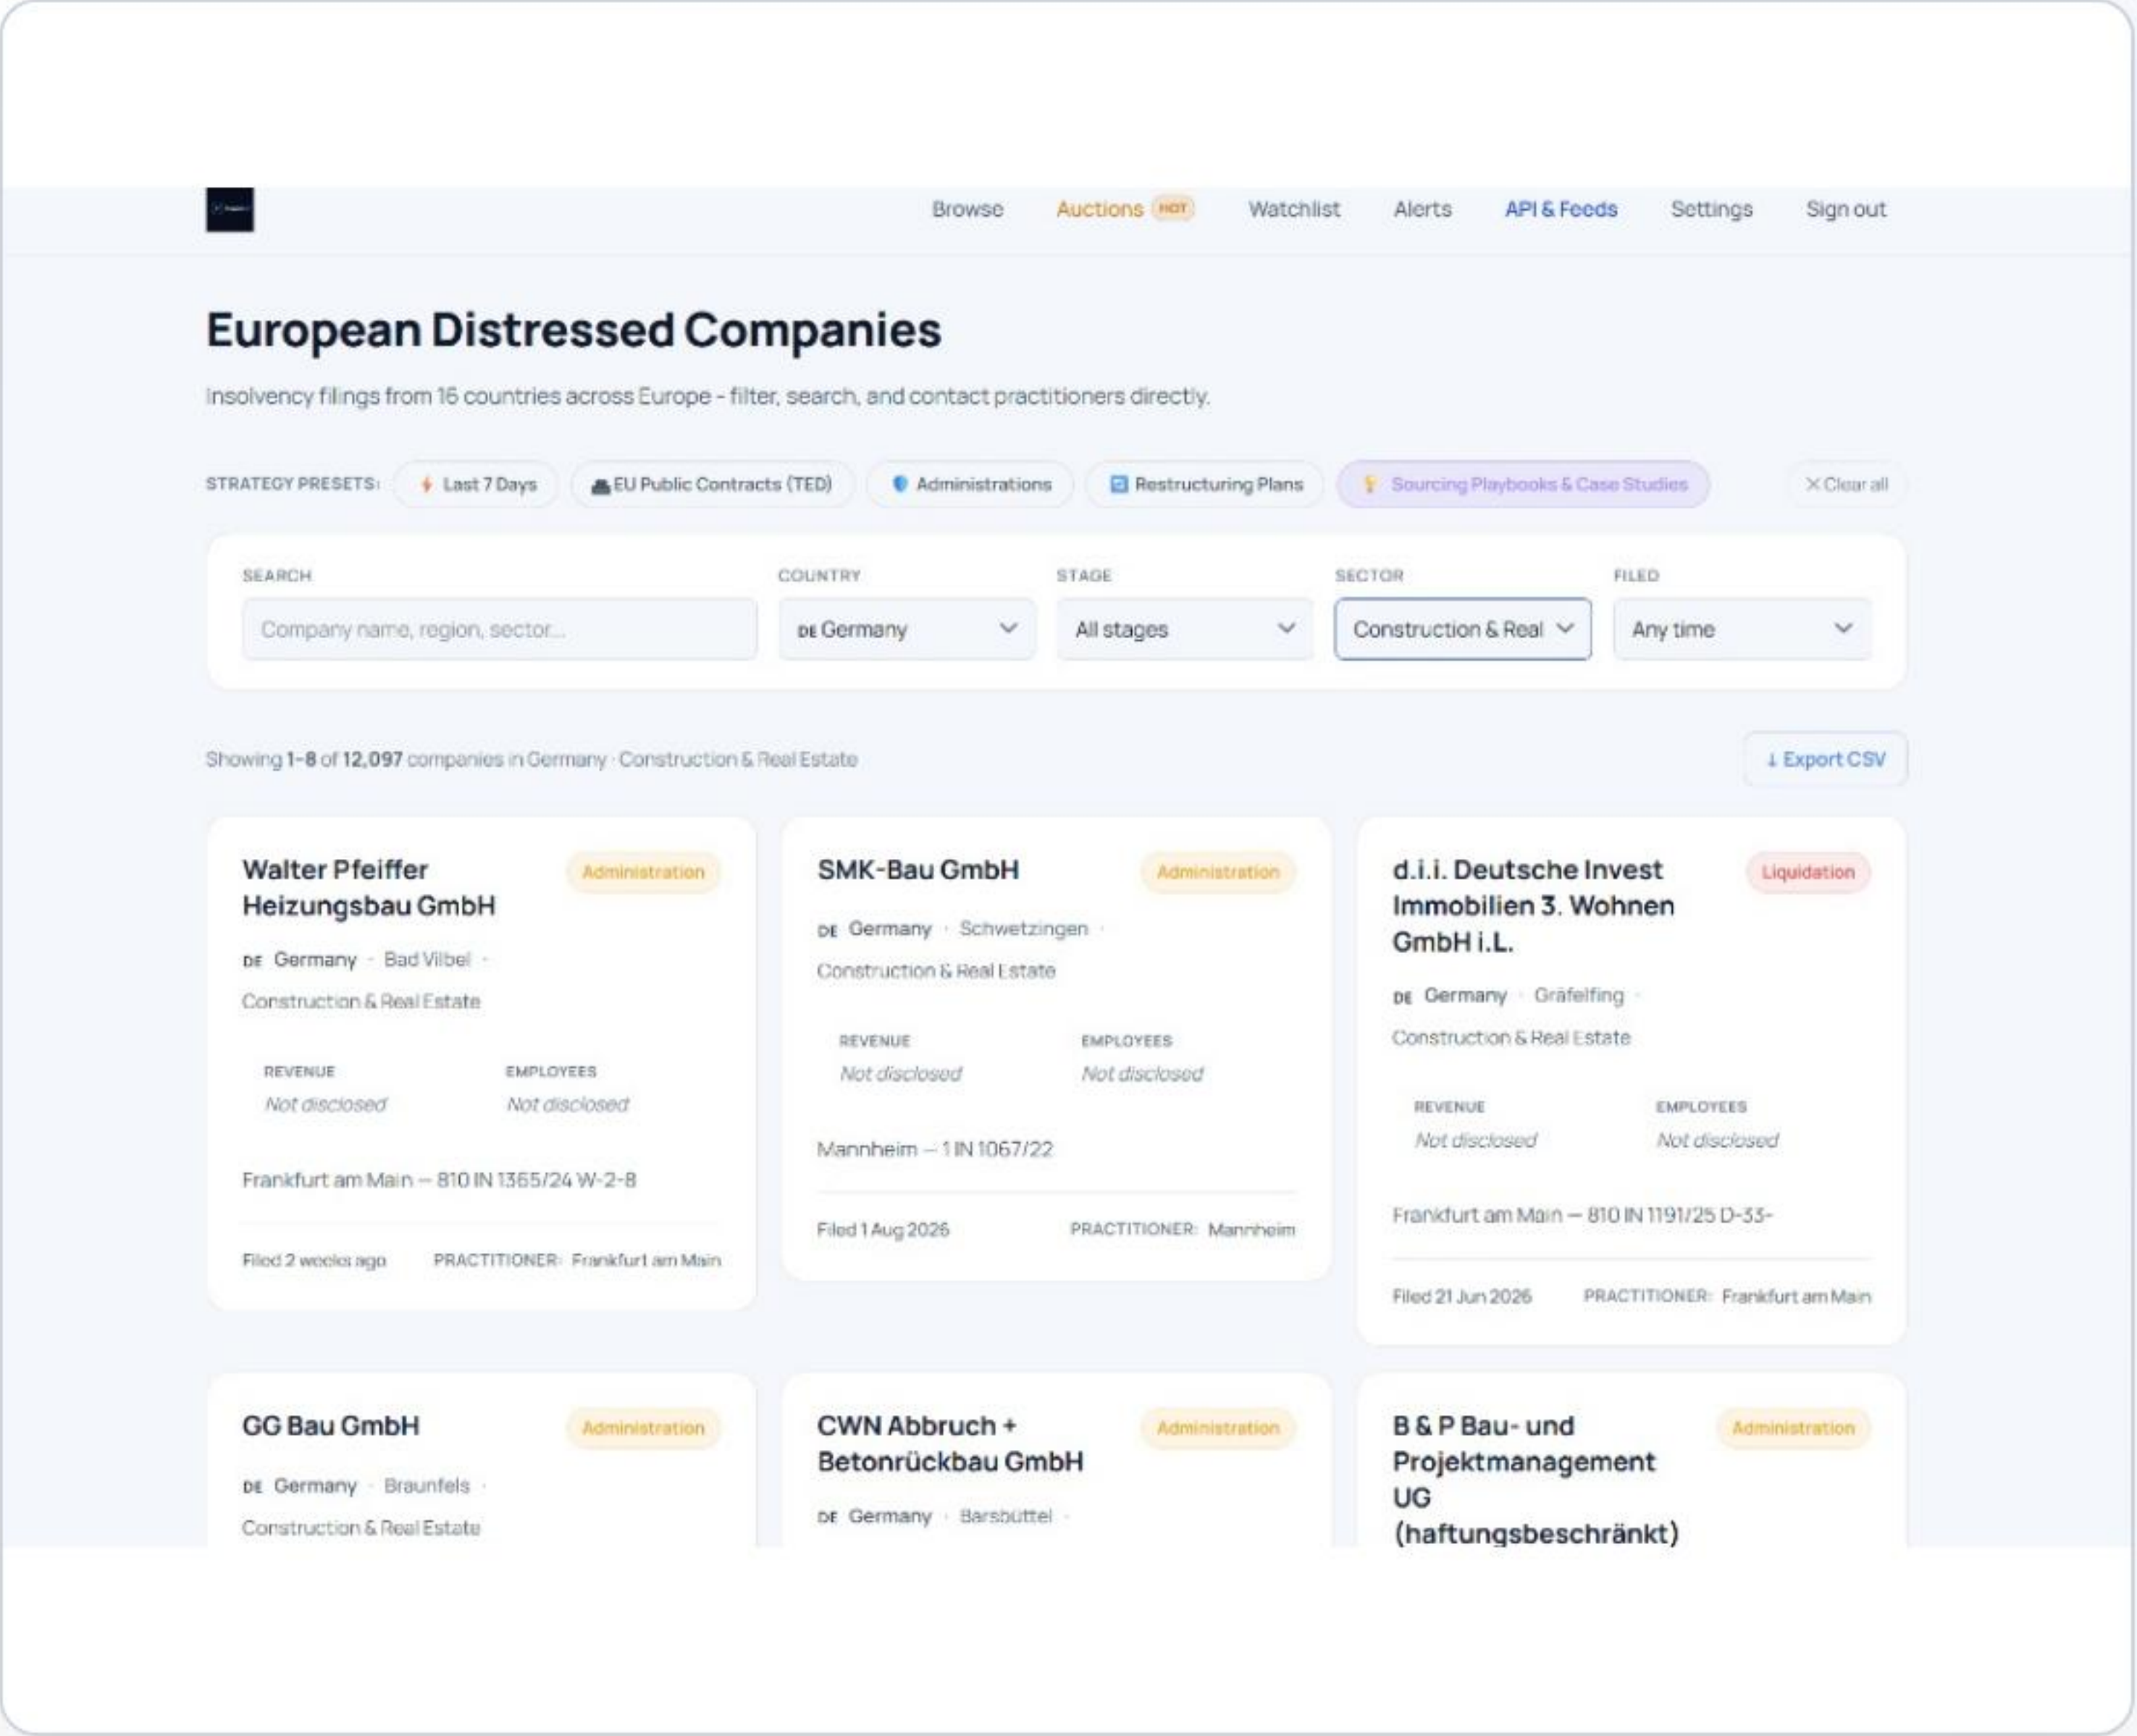

We ingest, translate, and normalize daily filings directly from 16 official European government registries (including France, Germany, UK, and Spain).

🕒 Pre-Auction Early Discovery

Discover targets before a formal process begins by identifying early-stage administration appointments and preliminary restructuring events.

🔄 04:00 GMT Daily Sync • 132,000+ Entities

Database updates daily at 4:00 AM GMT, currently tracking over 132,000 distressed entities so your team moves before markets open.

Go Straight to the Source

Practitioner Contacts

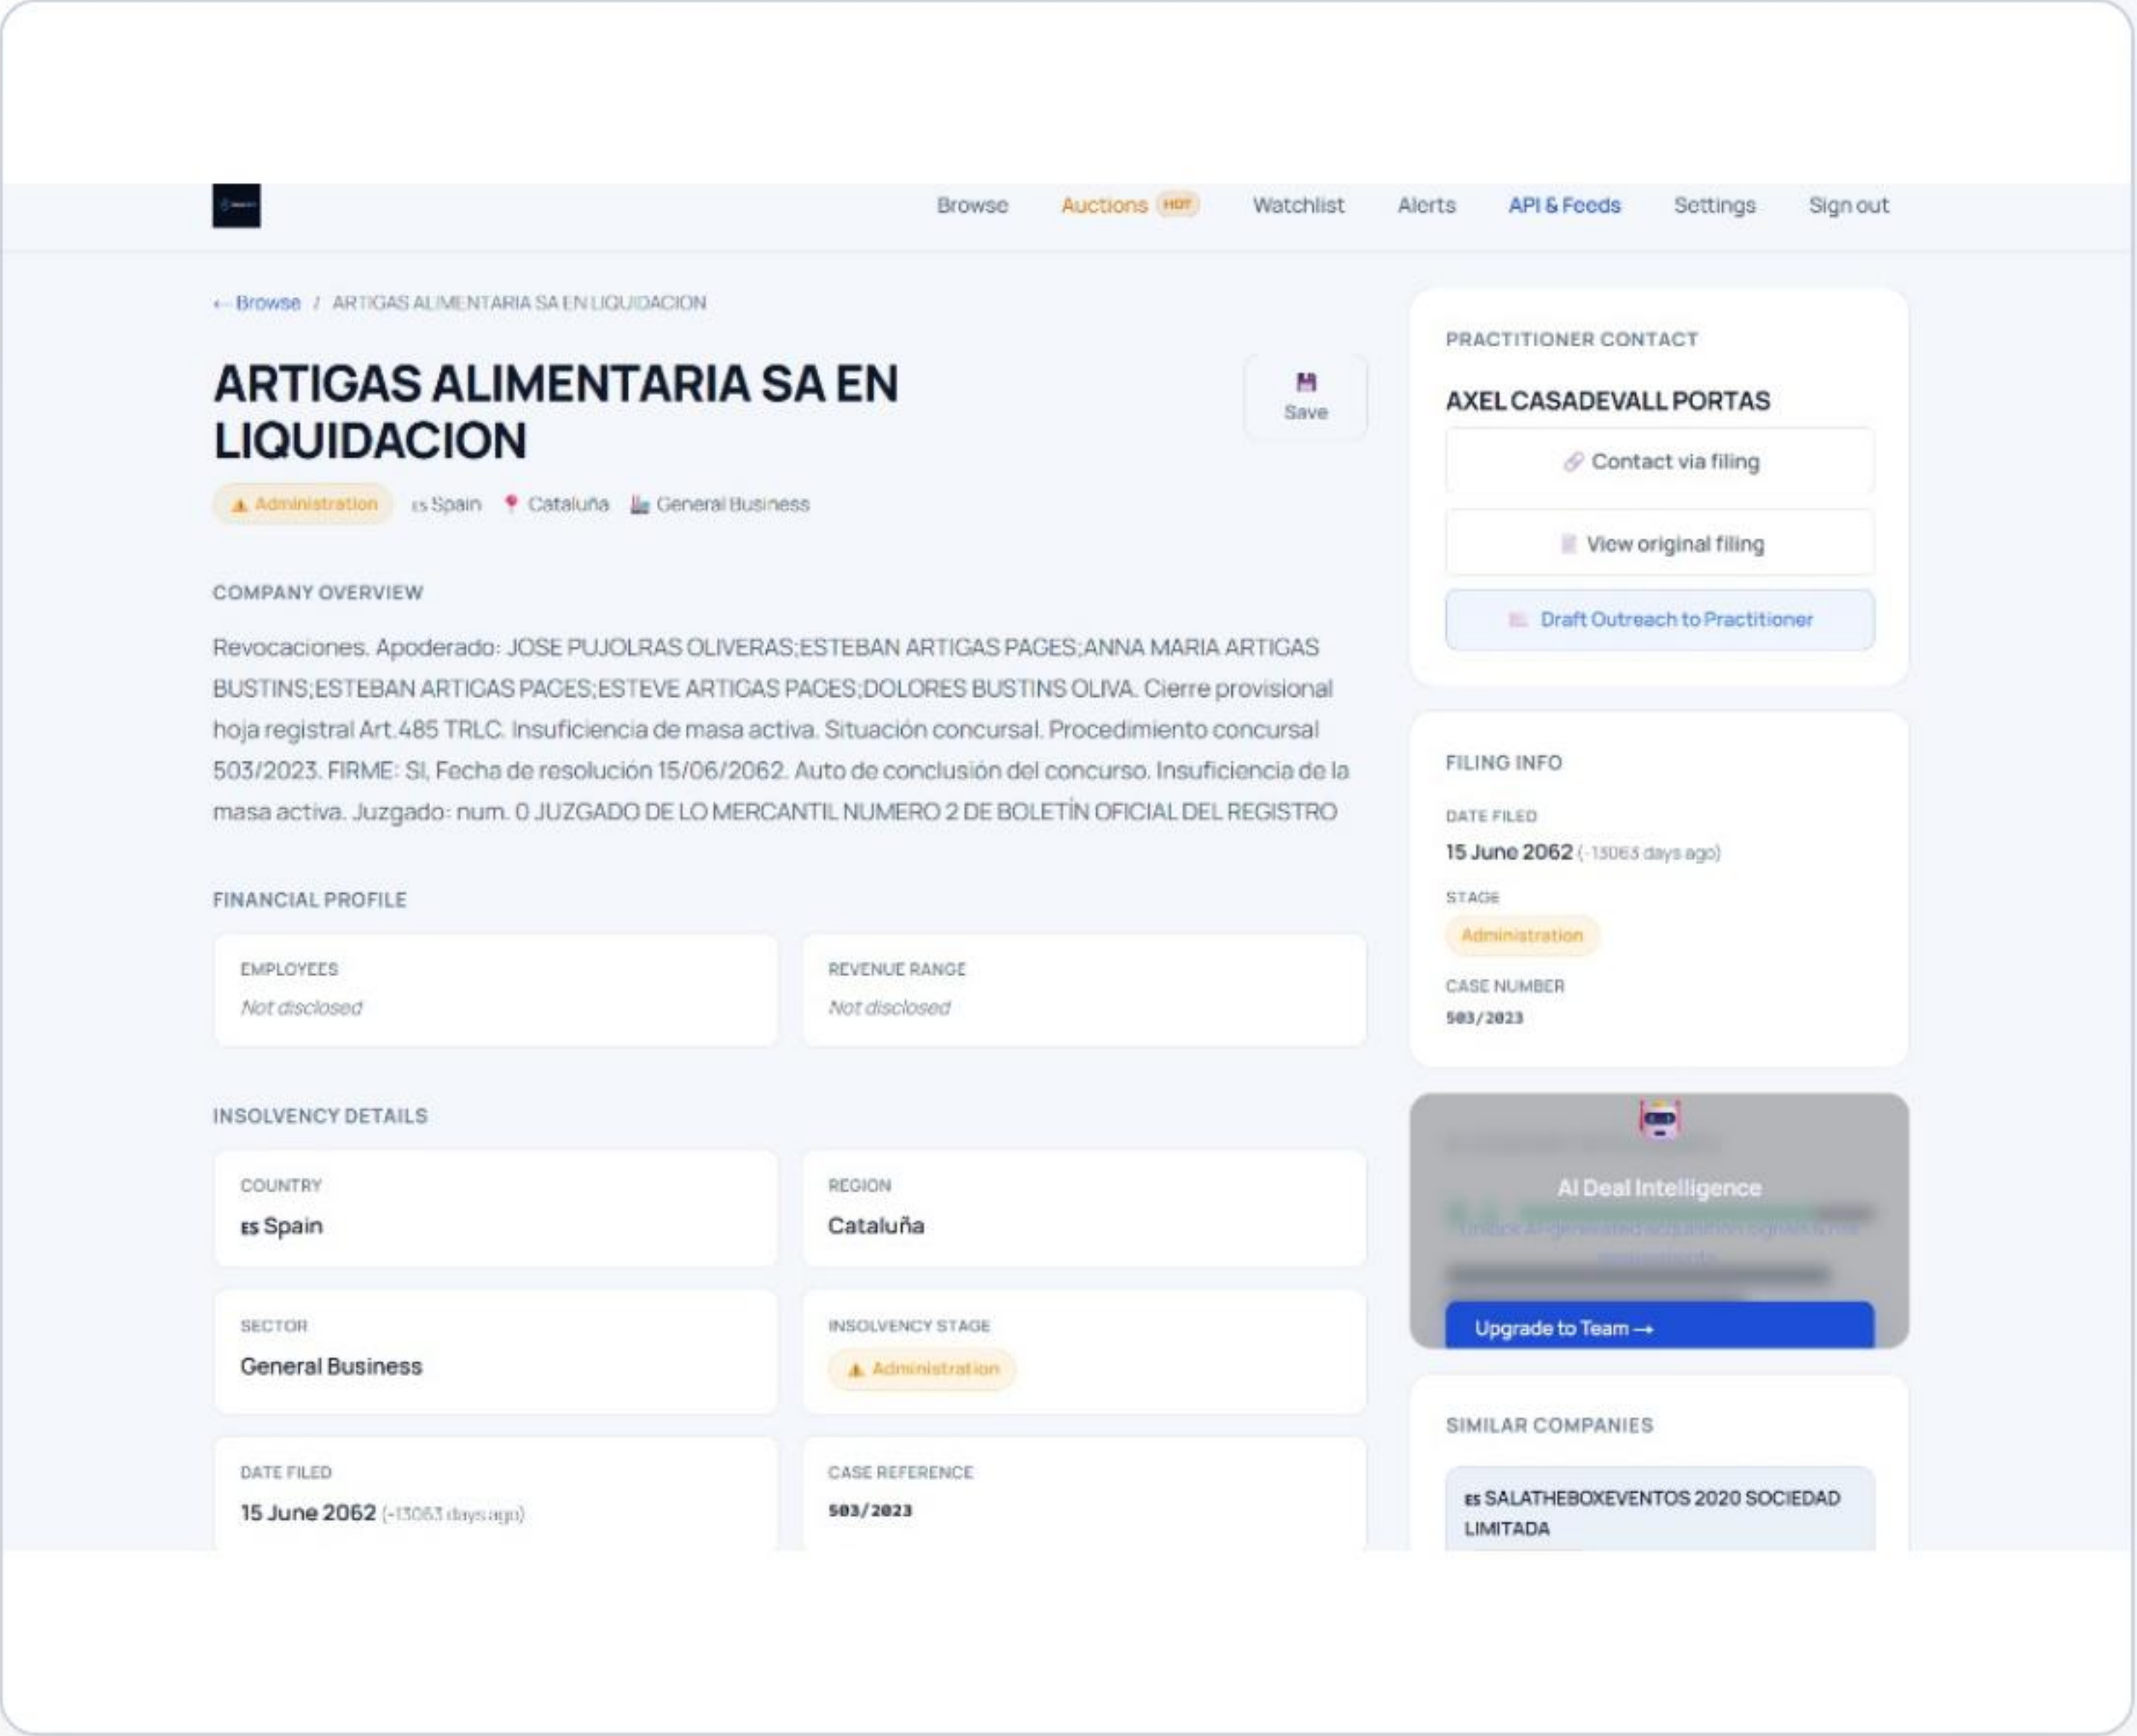

Get direct names, filing links, and firm details for appointed administrators and liquidators to initiate immediate bilateral outreach (available in ~30% of regions).

Tangible Assets Tracing

Track commercial real estate foreclosures, industrial machinery, and insolvency asset sales with starting auction prices (available in 6 major regions, incl. France & Italy).

Public Contracts & Tenders

Cross-reference distressed companies against active EU government tenders (TED) to identify secure revenue streams and ongoing enterprise contracts.

Never Miss a Target

Granular Logic Builder

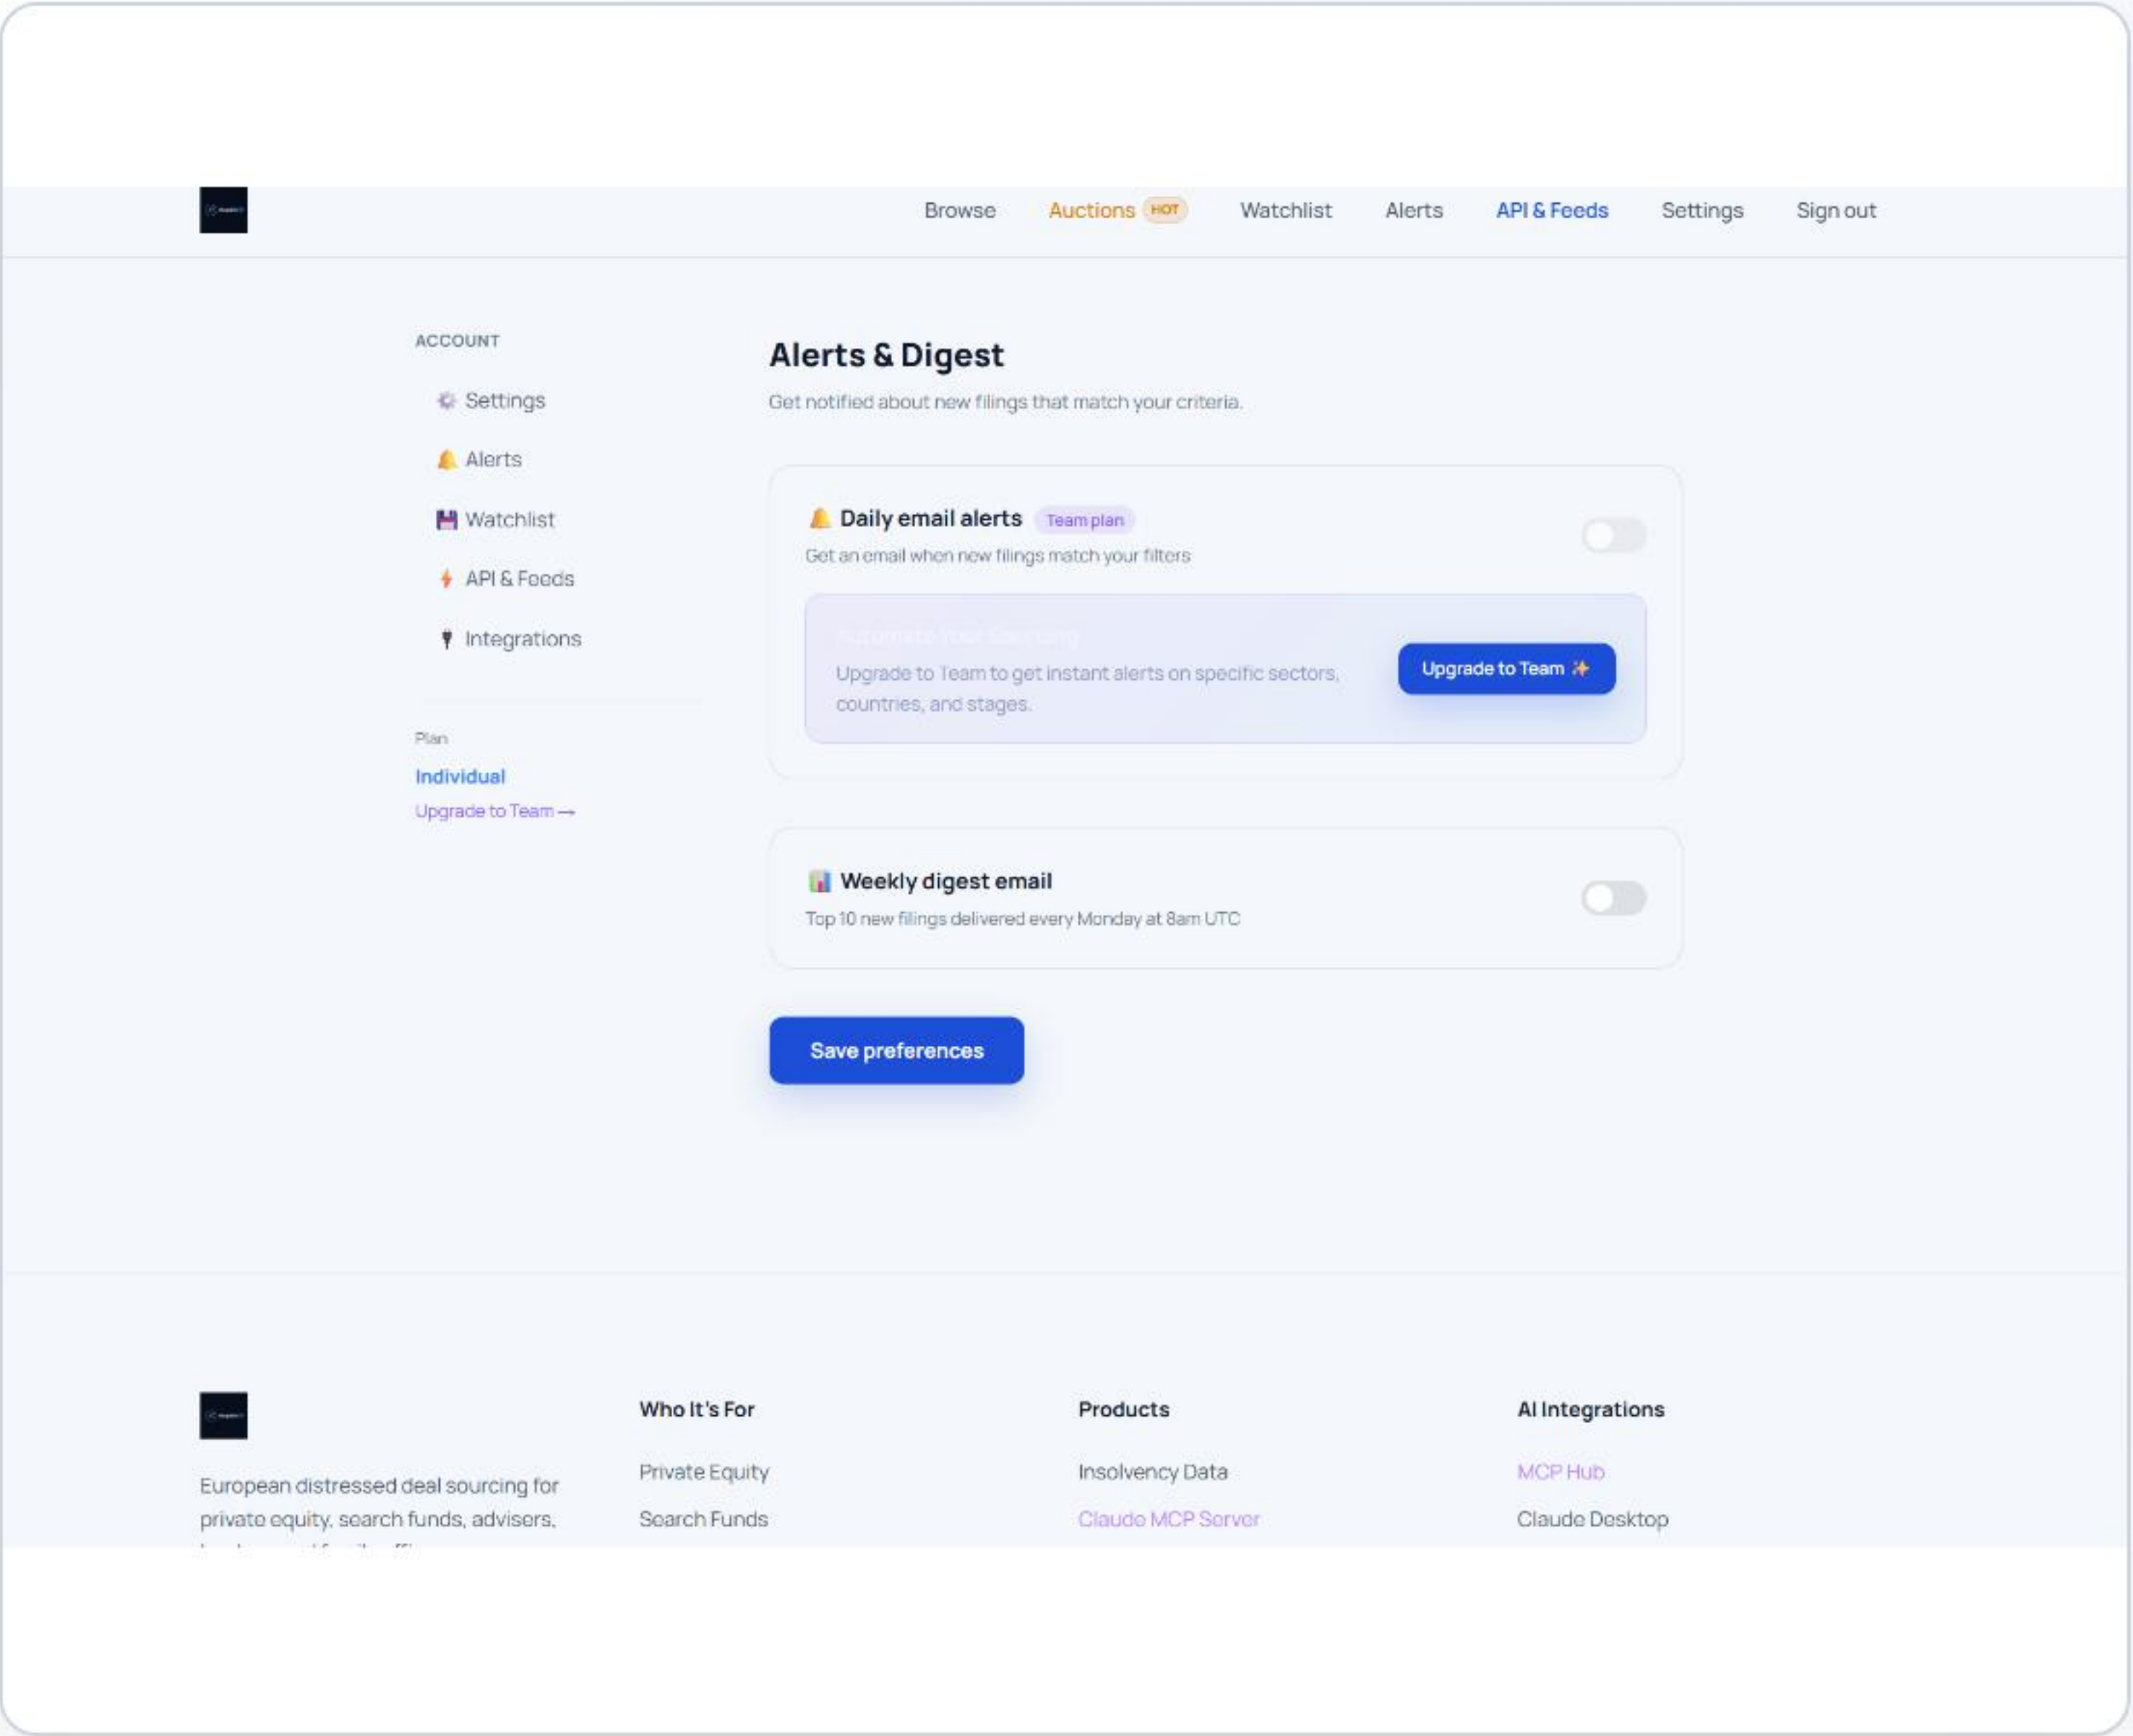

Build custom alerting logic based on Sector, Country, or Insolvency Stage (Administration vs. Liquidation) to monitor exact investment mandates.

Immediate Inbound Notifications

Receive immediate automated notifications or morning email digests the moment a target matching your criteria enters restructuring.

Frictionless Data Export

Export cleanly formatted datasets directly to CSV for internal financial underwriting, valuation models, or ingestion into DealCloud and Salesforce.

Query Data Using Plain English

Full Turnkey MCP Support

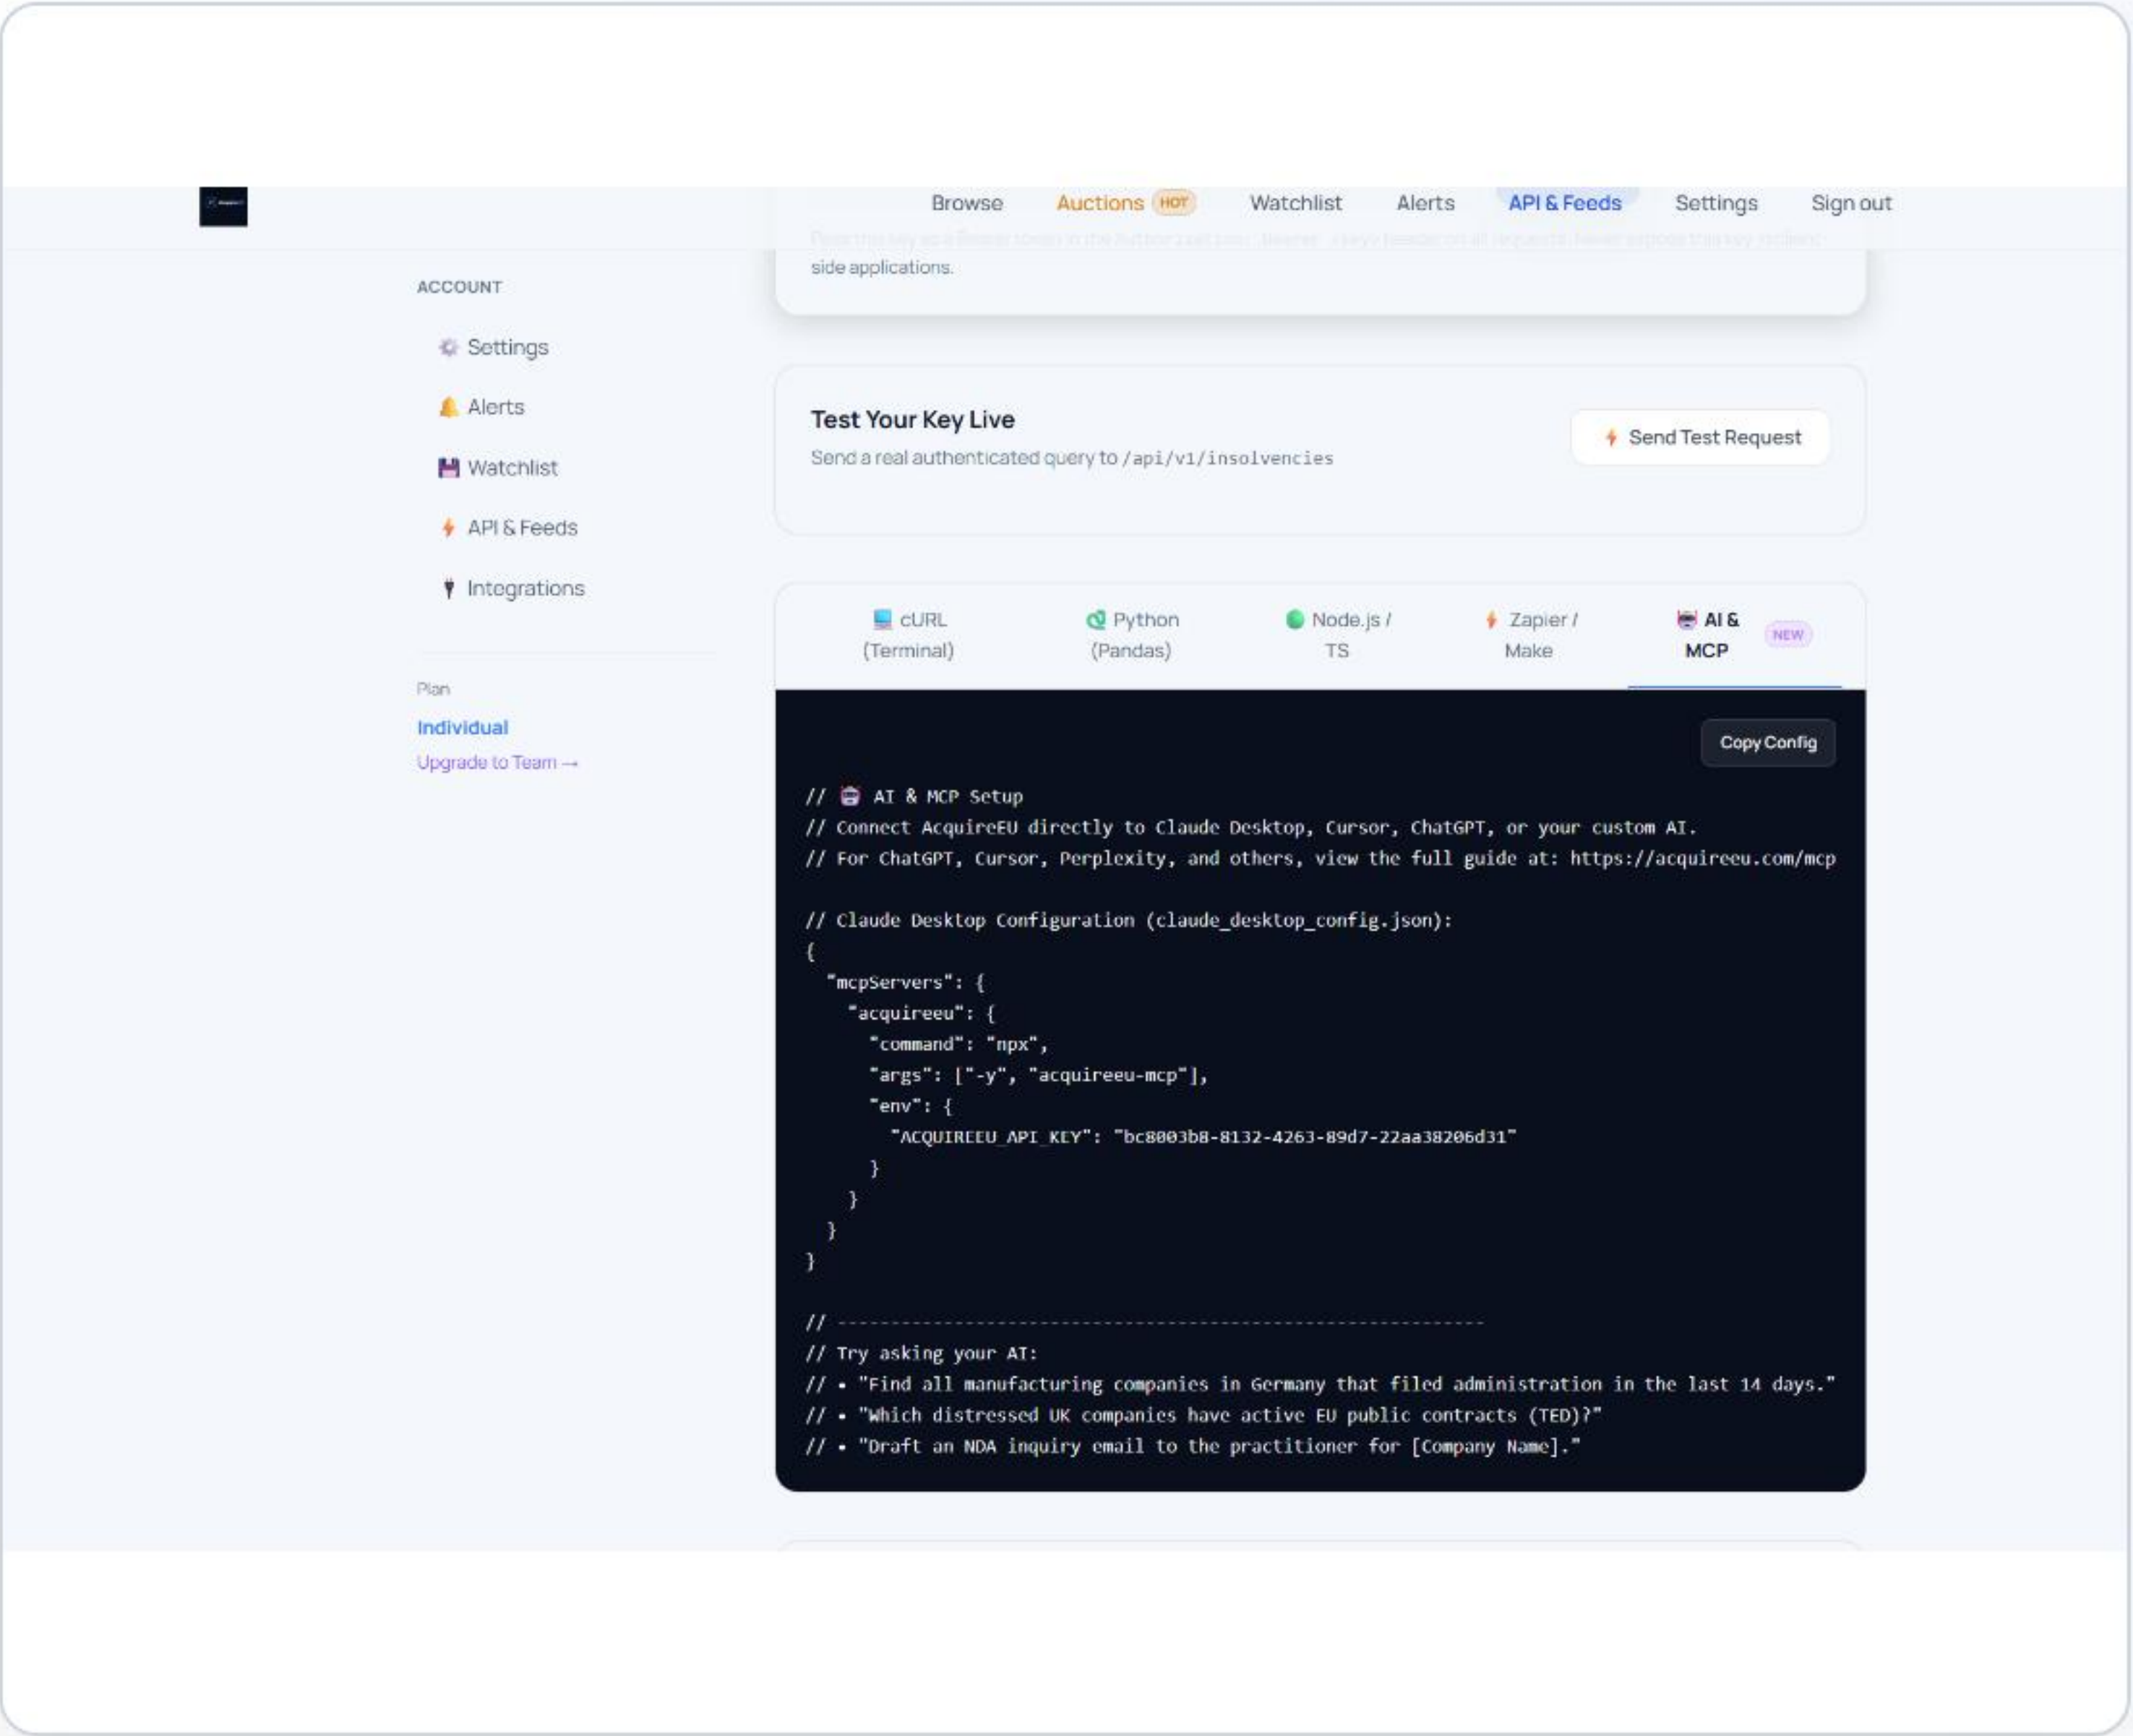

AcquireEU provides full Model Context Protocol (MCP) support out of the box for secure, standardized agentic data access.

Zero Coding Connection

Connect AcquireEU directly to your firm's AI assistants (Claude Desktop, Cursor, ChatGPT, Perplexity, or custom private LLMs) with zero coding required.

Production Query Example

"Find all manufacturing companies in Germany that filed for administration in the last 14 days and draft an inquiry email to the practitioner."

Transparent, Rolling Subscriptions

Team Plan

€299 / month

- ✓ **3 User Seats** for your active deal team
- ✓ Full historical insolvency data & court archive access
